

NURU HUSSEIN
Software Engineer II
Charlotte, North Carolina 28212

Phone: +1 301 755 8788

Email: husseinnour469@gmail.com

Professional Summary

Senior Software Engineer with 7+ years of combined professional experience spanning environmental science, higher education, data analysis, software engineering, and technical support, including nearly 4 years developing enterprise Java applications and 1 year supporting mission-critical production systems. Holds BSc and MSc degrees in Environmental Science with experience in environmental informatics, statistical analysis, and environmental impact assessment. Skilled in designing and developing cloud-ready microservices, REST APIs, data processing solutions, and CI/CD pipelines using Java, Spring Boot, Python, AWS, Kubernetes, and modern DevOps practices. Proven ability to bridge scientific domain expertise with enterprise software engineering to deliver scalable, reliable, and data-driven solutions across complex business and technical environments.

Technical Summary

- **Languages & Scripting:** Java, Python, SQL, JavaScript, TypeScript
- **Backend & APIs:** Spring Boot, Spring MVC, Spring Security, REST, SOAP, Microservices
- **Data & ETL:** PostgreSQL, MySQL, Oracle, DB2, MongoDB, JPA, Hibernate, ETL concepts
- **Cloud & DevOps:** AWS, Azure, OpenShift, Docker, Kubernetes, Jenkins, Git
- **Monitoring & Ops:** Splunk, Dynatrace, AppDynamics
- **Frontend:** Angular (SPA), HTML, CSS
- **Scientific & Analytics Tools:** R, SPSS, Statistical Analysis
- **Operating Systems:** Linux / Unix

Education

MSc – Environmental Science, 2019

BSc – Environmental Science, 2015

Certifications

- MCD-Level 1 (Mule 4)
- JavaScript Developer (W3Schools)
- Google Cybersecurity Certificate

Professional Experience:

Bank of America, Charlotte, NC (February 2023 to Present)

Software Engineer II

- Designed and developed scalable Spring Boot microservices and RESTful APIs supporting high-volume enterprise data processing and integration across AWS and VMware Tanzu (PCF) environments, achieving 99.99% application availability.
- Integrated REST and SOAP services with PostgreSQL, MySQL, MongoDB, Oracle, and DB2 using Spring Data JPA and Hibernate, optimizing data retrieval and improving application performance.
- Automated build, test, and deployment workflows using Jenkins and deployed containerized applications to OpenShift (Kubernetes), improving delivery efficiency and deployment reliability.

- Improved application quality and security by implementing SonarQube code analysis and remediation, reducing security vulnerabilities and increasing maintainability.
- Provided production support for Linux-based enterprise applications using Splunk, Dynatrace, and AppDynamics to diagnose performance issues, troubleshoot incidents, and reduce mean time to resolution (MTTR) by 40%.
- Implemented event-driven integrations using Apache Kafka and IBM MQ to enable reliable, scalable, and low-latency asynchronous data exchange between distributed systems.
- Collaborated with cross-functional teams including product owners, architects, QA engineers, and operations to design resilient software solutions, leveraging a strong analytical foundation in Environmental Science and data-driven problem solving.

Tech Stack: Java, Spring Boot, REST, SOAP, Kafka, MySQL, MongoDB, JPA, Hibernate, Jenkins, OpenShift, Docker, Kubernetes, AWS, SonarQube, Veracode, Splunk

Revature LLC. Reston, VA (November 2022 to February 2023)

Associate Software Engineer

- Developed Spring Boot RESTful microservices and SOAP-based integrations.
- Assisted with CI/CD automation using Jenkins and Docker.
- Built database-driven features and optimized SQL queries for Oracle and Sybase systems.

Tech Stack: Postman, Soap UI, Eclipse, Apache Tomcat for deployment, Jenkins, GIT, MySQL with Squirrel SQL Client, spring, and Hibernate Framework, JUnit's.

Generation USA (March 2022 to September 2022)

Full Stack Java Developer Trainee (Training)

- Built full-stack applications using Spring Boot REST APIs and Angular front-end components (HTML/CSS).
- Implemented authentication and authorization using Spring Security.
- Practiced unit and UI testing with JUnit, Jasmine, and Karma following Agile principles.

Tech Stack: Java, Servlets, JavaScript, Bootstrap, SQL, Spring Data JPA, HTML, CSS, Spring Security, Maven, Eclipse.

Adigrat University, Ethiopia (September 2016 to June 2019)

Instructor (Full-Time), Environmental Science (Environmental Informatics Focus)

- Taught Environmental Informatics and Environmental Science courses, integrating software tools and programming concepts to analyze and interpret environmental data.
- Delivered lectures and hands-on labs covering data analysis, databases, and applied computing for environmental applications.
- Guided students in using statistical and analytical software to process and analyze environmental datasets related to water resources, ecosystems, and environmental monitoring.
- Supervised data-focused student projects, emphasizing practical application of programming, data management, and quantitative analysis to real-world environmental problems.
- Translated complex technical and research concepts into clear, accessible explanations for students and non-technical audiences, fostering interdisciplinary understanding.

Bati Town, Ethiopia (September 2015 to September 2016)

Mining & Energy Environmental Analyst

- Conducted environmental impact assessments (EIA) for mining and energy projects, evaluating effects on water resources, soil stability, air quality, and ecosystems.
- Performed statistical analysis of environmental datasets using R and SPSS to assess trends, risks, and regulatory compliance.
- Prepared technical and non-technical reports translating scientific findings into actionable recommendations.
- Collaborated with geologists, engineers, and regulators to support evidence-based environmental decision-making.
